The Sixth Virtual Project meeting of GrEnFi was supposed to be held in Munich, but due to the Covid pandemic has been split into two parts: one organized virtually and the other one in presence in Munich.

The virtual part of the meeting took place on 10th and 11th of March, 2:00 PM – 5:00 PM (Brussels Time).

During the first day we had the chance to have an overview of the activities of the partners in the last months, with a focus on the ongoing pilot class, some validation activities and the current state of the project evaluation results.

The second day we discussed instead about the activities of the near future: the most important points have been the full immersion experience 2022 in Bertinoro and the dissemination and sustainability of the project.
