Greening Energy Market and Finance
GrEnFl is mainly committed to face the new challenges of a transforming world with an inclusive global view by:

- Contributing to the **decarbonizing process** of the EU economy through investment in knowledge and competences for either **high education and professional training** in the Energy Sector

- Designing an **innovative and interdisciplinary** European approach and framework to educate the "hero of the green economy", i.e. the **Sustainable Energy Expert**, having the pivotal role to assure for a vital economy with an environment-preserving behavior of companies and stakeholders

- Developing and consolidating a **long-lasting network** and cooperation among **industries and academia** in the Energy Sector

- Disseminating the **best practices** to address **energy cross-border challenges** in view of a sustainable development of the EU
